

POWER SKILLS

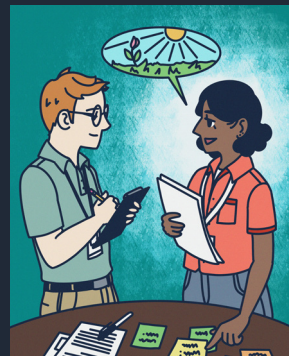

These Power Skills capture the behaviors and mindsets that help teammates thrive on our program, how we collaborate, adapt, and take ownership in a fast-moving, ambiguous environment. They are designed to support self-reflection and build self-awareness, helping teammates understand their strengths and growth areas. We don't expect anyone to excel in every skill; instead, they create a shared language for coaching and enable us to build stronger, more complementary teams by recognizing where teammates shine and where they need support.

We look for all teammates to bring the first five Power Skills into how they work day-to-day, as they reflect the core of how we show up for each other and our partners. The remaining eight are areas we expect to build over time, as individuals grow in their roles and contributions. Culture and fit matter deeply here, these skills shape not just how we work together, but the quality and impact of what we deliver.
